

SUMMARY

As a recent college graduate, I am eager to apply and expand my programming skills working as a fullstack web developer. My degree in computer science has given me the confidence to tackle difficult problems and solve them economically. I enjoy challenging myself and have trouble abandoning a problem if it has not been solved. While my left brain enjoys solving puzzles and thinking logically, my right brain has an appreciation for visual and experience design and brings a creative element to my process.

SKILLS

Web Development: JavaScript, HTML5, CSS3, React, Express, Node.js, PostgreSQL, APIs, JSON, jQuery, AJAX, Git, Ruby

Other: Sketch, Adobe Photoshop, Wireframing, Google Analytics, SEOptimer

EMPLOYMENT

General Assembly | Delorean

New York, NY

Web Developer

07/17 - 09/17

Gained proficiency in fullstack web development and used new skills and technical tools to build four projects over the course of the 12-week program.

RebelMouse

New York, NY

Marketing Intern

06/15 - 08/15

- Implemented trial process to automate building relationships with similar brands and potentially grow clients' audiences.
- Aggregated content for speaker profiles on the Roar Summit website.

Interactive Strategies

Washington, DC

Intern

06/14 - 08/14

- Created content audits for several client websites including Bloomberg BNA and SMS/800.
- Tracked and analyzed social media insights for Maryland Live Casino.
- Collected and compiled analytics data to inform the website redesign for RCN, one of their biggest clients.

Atlantic Media Strategies

Washington, DC

Intern

01/13 - 06/13

- Participated in a large team project that assessed content, design, and UX of several websites for different major organizations, including AARP and ACLU, as well as corporations, including IBM and Verizon.
- Helped conduct client research.

WEB DEVELOPMENT PROJECTS

Defacer

This app allows users to sketch over (essentially "defacing") famous paintings. Logged in users can save their work to the public gallery. Created in javascript with express backend and react frontend.

Food Diary

A web application that lets users look up and track the calorie information of foods they have consumed. Users can view their archive of food entries and graphs displaying their daily calorie intake by month. Created in javascript with express.

Bejeweled Lite

A simplified version of the original bejeweled game. Created in javascript with jQuery.

EDUCATION
