## SKILLS

JavaScript, Node.js, jQuery, Ruby on Rails, SQL, Google Apps Script, Express, HTML5, CSS3, Bootstrap, React, Selenium, Webdriverio, Appium, Browserstack, Chai/Mocha, Rspec

## EMPLOYMENT

### Ambulnz | New York, NY

Software Developer in Test

05/19 - Present

- Led QA team in building custom framework using Webdriverio and Appium to automate end to end testing, including multi-browser and iOS testing
- Transferred over 250 test cases into automation framework, reduced time spent on manual testing
- Refactored codebase with modular approach to improve scalability

QA Engineer

01/18 - 05/19

- Conducted regression testing and feature testing
- Investigated and isolated bugs using advanced SQL queries
- Automated regression cases in test automation software; incorporated JavaScript into software to optimize runtime and stability
- Automated tests for payment service and implemented cross-browser remote testing in Browserstack

### DADA | New York NY

Front End Developer Intern

11/17 - 01/18

- Translated mockups into front-end UI using HAML and SASS
- Implemented front-end functionality for chat widget

### General Assembly | Delorean

Full stack Web Developer

07/17 - 09/17

- Participated in an immersive 12-week full stack web development program, built upon existing coding experience and Computer Science background by learning new programming skills and technical tools.

## EDUCATION

### Wesleyan University

B.A. Computer Science

### General Assembly

Certificate, Web Development Immersive

Certificate, UX Design

Certificate, JavaScript Development
